

Custom Gaging Solutions

Gaging Parameters

GAGING SYSTEM:

- Air to electronic

OPERATION:

- Manual

NUMBER OF CHECKS: 1

CLASSIFICATION:

- none

SORTING:

- Good/reject

FEATURES:

- Spiral rifle bore land & groove diameters

CONTROL:

- Accusetter II column
- Trendsetter II column
- CAG^{QCM}

RIFLE BORE GAGING

Measuring the bore of a gun barrel is not easy task. Especially if you desire to measure the diameter of the spiral “rifle” groove, or the land diameter between these grooves.

Edmunds Gages offers gun barrel air plugs designed for every combination of size and rifle rate. These plugs are available in hard chrome plated steel, and are used with Edmunds backpressure bleed air gaging systems or many other popular systems.

The results of the measurement can be displayed on any of Edmunds Gages air-to-electronic readout devices, making interpretation of the measures a breeze!
